

ARE YOU ATTENDING THE INLAND MARINE EXPO IN NASHVILLE, TN, MAY 29-31?

See the Netwave NW8000 Compact VDR: Centralized Data Collection and Enhanced Vessel Protection

The NW8000 Compact VDR, a versatile Voyage Data Recorder (VDR) designed to offer the robust features and secure data collection capabilities of a full-size VDR in a compact and cost-effective package. With the capability of capturing all vessel Video/Audio and NMEA data in 1 package.

"The NW8000 Compact VDR is ideal for a wide range of vessels, including inland waterway vessels, workboats and pleasure craft," said Terry Crockett, spokesperson for Netwave. "This innovative solution provides all the essential features needed to protect your vessel, crew, and valuable data."

Protect Your Vessel, Crew, and Data

The NW8000 Compact VDR offers a centralized location for securing critical vessel data, including:

- Audio and Video Recordings
- All Vessel Data with NMEA Time Stamping
- Bridge-Based Input for All Data and Video

Compact Design, Uncompromising Security

Despite its compact footprint, the NW8000 Compact VDR maintains the highest level of security, composed of IMO SOLAS regulated hardware. This ensures all collected data is tamper-proof and readily available for accident investigation, regulatory compliance, and performance analysis.

Comprehensive Features for Enhanced Vessel Management

The NW8000 Compact VDR comes packed with a range of valuable features, including:

- Multi-tasking Onboard Viewer (Playback V2.0)
- Remote Viewing Software for Onshore Monitoring
- 2TB-4TB NAS Drive Data Storage Options
- Global Service and Support Network

Peace of Mind with Remote Monitoring

The NW8000 Compact VDR allows for remote viewing by authorized personnel onshore, providing real-time situational awareness and the ability to monitor vessel activity from any location.
